Re: LightSquared Subsidiary, LLC
Ex Parte Communication. IB Docket No. 11-109
IBSF File No. SAT-MOD-20101118-00239

January 5, 2012

Ms. Dortch,

I am writing this letter to voice my objection of LightSquared using the proposed frequency that will cause interference with my high accuracy GPS system. We have invested over \$40,000 dollars in the RTK – GPS system we now use to located dams, streams, water quality sampling points, floodplain elevations, etc. I know that my agency's investment is small compared to other companies especially private ones. I can't see where allowing LightSquared to interfere with what is already a tough means to get location data due to multipath and other atmospheric problems is a benefit to citizens of this country.

Allowing LightSquared to move forward is to move professionals that rely on accurate and quick location data backwards in time and will ultimately cost the citizens and government more money! Please do not allow this to happen.

Thank You,

Ron Redman
Survey Intern #633
